21 Dogs Seized in Logan County, Oklahoma

Update regarding the status of the pets seized in Logan County, Oklahoma

TULSA, OKLAHOMA, JANUARY 16, 2026 – The Humane Society of Tulsa was contacted by Logan County Deputies to assist in the seizure of 21 dogs from deplorable conditions in Coyle, Oklahoma on January 9, 2026. The dogs were found to be living in a small home where they were forced to live in their own urine and feces, as they had no access to the outdoors. Upon examination, the dogs were found to have treatable medical conditions that have gone unmanaged. Many of the pets have significant dental diseases, respiratory issues, hair loss and rashes from external parasites, as well as vision/eye complications.

The dogs have been resting and getting healthy with the staff at the Humane Society of Tulsa since the evening of Friday, January 09, 2026. Tuesday, we received word from the Logan County District Attorney's Office that custody of the pets was granted to HST, allowing us to begin treatment of ongoing medical needs and perform spay/neuter procedures to prepare the pets for adoption to loving homes.

As we work through preparing these loving pets for adoption into their new homes, we appreciate the ongoing support of the community. The dogs will be posted on our website at tulsapets.com when they are available for adoption. We expect they will not be available to adopt for a few more weeks. Donations can also be made on our website at tulsapets.com to help cover the medical expenses involved in their care.

Humane Society of Tulsa is a 501c3 non-profit organization serving the Tulsa metro and surrounding communities throughout Oklahoma.
